Kevin Bou Akar

Computer Science Student | Cybersecurity Enthusiast

Computer Science student with a strong passion for cybersecurity, currently sharpening skills in penetration testing, reverse engineering, and network security. Always learning, always curious. From CTFs to any other field cyber-related, I thrive on understanding how systems work and how to break them ethically.

EDUCATION

Lebanese University Hadath Campus, Faculty of Sciences - Hadath, Lebanon
Bachelor's in Computer Science - Expected 2027 (In Progress)

- **Relevant Coursework:** Operating Systems, Computer Architecture, Data Structures & Algorithms, Database Systems, Software Engineering, Network Security, Object-Oriented Programming, Web Development, Introduction to Cybersecurity, Introduction to AI

Collège Notre-Dame de Louaize - Zouk Mosbeh, Lebanon
Lebanese Baccalaureate in General Sciences - June 2023

PROFESSIONAL EXPERIENCE

Dunkin' - Jeita, Lebanon
Supervisor - Jul 2024 – Present

- Managed 50+ customer orders per hour during peak rush periods through effective multitasking
- Independently managed full store operations on multiple occasions, overseeing staff and inventory

Garderie Crystal - Zouk Mosbeh, Lebanon
Summer Camp Supervisor - Jul 2023 – Sep 2023

- Supervised children aged 9–12, facilitating skill development activities according to structured curriculum
- Managed group dynamics and resolved conflicts while maintaining a supportive environment

SKILLS

- **Programming Languages:** C, Python, Bash, PowerShell, JavaScript
- **Operating Systems & Tools:** Windows, Arch Linux, Kali Linux, WSL, Ubuntu, Git, VS Code, Vim, VirtualBox, Burp Suite, Wireshark
- **Cybersecurity:** Reverse Engineering, Network Security, Web Application Security, Cryptography, Binary Exploitation, Social Engineering
- **Soft Skills:** Leadership, Communication, Team Collaboration, Time Management, Multitasking, Adaptability
- **Languages:** English, French, Arabic

HONORS AND AWARDS

Google
IT Support Professional Certificate - ETA June 26
Professional certificate building strong fundamentals and covering networking essentials, operating systems, system administration, and IT security basics.

Semicolon Universities CTF Participant - 2025
Solved challenges in reverse engineering, forensics, and cryptography — Utilized my OSINT skills to gather information about certain topics or individuals to uncover the hidden flag and reversed an obfuscated PowerShell script to decode an encoded SHA-256 flag.

Global Ynov Partners CTF Challenge - HackTheBox - 2026
Ranked 41st out of 71 teams, solving 10/38 challenges and scoring 5,600 points. Joined the competition with only 5 hours remaining on the clock. Solved challenges spanning multiple cybersecurity domains under time pressure.

PROJECTS

⋆ **Winfiles - Windows Configuration Repository** - May 2025 - (github.com/kevinbouakar/winfiles)

- Centralized repository for Windows system configurations including VSCode profiles, PowerShell scripts, Starship prompts, and terminal customizations
- Streamlines development environment setup and system restoration

⋆ **Automated Google Drive Backup System** - Feb 2026

- PowerShell-based backup automation for laptop and phone data with organized hierarchical structure
- Implements encrypted vault storage for sensitive credentials and keys

⋆ **Technical Documentation & Tutorials**

- Maintain Obsidian-based knowledge vault with structured categories for cybersecurity research, daily notes, project documentation, and technical guides
- Document troubleshooting solutions and system configurations based on hands-on experience for personal reference and knowledge sharing
